IN ASSEMBLY,

February 2, 1831.

ANNUAL REPORT

Of the Commissioners of the Canal Fund.

To the Legislature of the State of New-York:

The Commissioners of the Canal Fund, pursuant to chapter nine, title two, of the first part of the Revised Statutes, respectfully submit the following Report:

CANAL FUNDS.

The canal funds are as follows:

Erie and Champlain Canal Fund.

The canals,	$
Bond of the corporation of the city of Albany, for a loan bearing 6 per cent. interest,	50,000 00
Stock of the Delaware and Hudson canal company, bearing 5 per cent. interest,	200,000 00
Stock of the Neversink navigation company, bearing 5 per cent. interest,	10,000 00
Lands on Grand-Island, sold by the Surveyor-General, but no bonds given therefor, and now reverted to the State, acres $7,760\frac{25}{100}$	
Lands given by the Holland land co.. " 100,000	
do do John Hornby, " 3,000	
do do Gideon Granger, " 1,000	

OSWEGO CANAL FUND.

The canal, ...	$
Lands unsold in the Onondaga salt springs reservation,	

CAYUGA AND SENECA CANAL FUND.

The canal, ...	$

RECEIPTS AND EXPENDITURES IN 1830.

ERIE AND CHAMPLAIN CANAL FUND.

Balance of the revenue of this fund in the hands of the Commissioners on the 1st January, 1830, ...	$563,909 82
Received by the Commissioners during the year, (see statement A,)	1,479,360 50
	2,043,270 32
Expended during the year, (see statement A,)	655,173 37
Balance of this fund in hand, 31st Dec. 1830, ...	$1,388,096 95

OSWEGO CANAL FUND.

Received by the Commissioners during the year, (see statement B,)	$60,988 70
Expended during the year, (see statement B,)	60,988 70

CAYUGA AND SENECA CANAL FUND.

Received by the Commissioners during the year, (see statement C,)	$34,267 12
Expended by the Commissioners during the year, (see statement C,)	34,267 12

CHEMUNG CANAL FUND.

Received by the Commissioners during the year, (see statement D,)	$165,694 00
Expended during the year, (see statement D,)	72,315 00
Balance of this fund in hand, 31st Dec. 1830, ...	$93,379 00

SUMMARY.

Balance in hand of the Erie & Champlain canal fund,			$1,388,096 95
do	Oswego,	"	0,000 00
do	Cayuga and Seneca,	"	0,000 00
do	Chemung,	"	93,379 00
		Total,....	$1,481,475 95

The monies in the hands of the Commissioners, are on deposit to their credit, as follows, viz:

In the New-York State bank in the city of Albany,.		$694,863 11
Mechanics' and Farmers' do.	do.	693,233 84
Merchants' and Mechanics' do.	Troy,...	93,379 00
	Total,....	$1,481,475 95

ESTIMATE OF RECEIPTS AND EXPENDITURES, FOR THE YEAR 1831.

Erie and Champlain Canal Fund.

Revenue.

Canal tolls, exclusive of the tolls to be collected and paid over to the proprietors of the Albany basin,.................	$1,000,000 00	
Vendue duty,.............	180,000 00	
Salt duty, ...	150,000 00	
Rents of surplus waters, ...	1,500 00	
		$1,331,500 00

In addition to the above regular amount of revenue of the principal of the fund, the following revenues arise from investments of its surplus moneys, viz:

Interest upon $200,000 of stock of the Delaware and Hudson canal co. at 5 per cent, ...	$10,000 00	
Interest on $10,000, stock of the Neversink navigation co. at 5 per cent....	500 00	
Interest on a loan of $50,000 to the city of Albany, at 5 per cent..........	3,000 00	
Interest on the deposit of the fund,....	24,000 00	
		37,500 00

Showing the whole estimated income of the fund for the year 1831, to be...............................$1,369,000 00

Expenditures.

For interest on loans, ...	$379,486 80	
By superintendents of repairs,.......	210,000 00	
For the collection of tolls, including pay of inspectors, and all the expenses of the collectors' offices, ...	23,000 00	
By the Canal Commissioners, including payments for damages, ...	15,000 00	
For salaries of weigh-masters, the pay of their assistants, and the expenses of the weigh-locks,...............	4,500 00	
For printing, including blanks, circulars and all other printing for the canals,	1,500 00	
For compensation of the canal appraisers,........................	2,000 00	
For incidental expenses of the Commissioners of the Canal Fund, ...	400 00	
For extra allowances by Canal Board,.	500 00	
For costs in suits instituted for the recovery of penalties for the violation of canal laws and regulations,......	300 00	
For clerk hire of the canal room,.....	1,880 00	
		$638,566 80
Which expenditures being deducted from the estimated income, as above given, will show an estimated surplus for the year 1831, of............		$730,433 20

Oswego Canal Fund.

Revenue.

Canal tolls,..........................	$12,500 00	
Rents of surplus waters, ...	800 00	
		$13,300 00

Expenditures.

For interest on loans, ...	$21,850 00	
By the superintendent of repairs, including payments to lock tenders,.............	10,000 00	
By the Canal Commissioners, including payments for damages, ...	3,000 00	
Carried forward,....	$34,850 00	$13,300 00

Brought forward,....	$34,850 00	$13,300 00
For the collection of tolls, including all the expenses of collectors' offices,........	1,800 00	
		36,650 00
Thus showing a deficiency in the revenue of this fund to meet the charges upon it, for the year 1831, of ..		$23,350 00

Cayuga and Seneca Canal.

Revenue.

Canal tolls,..		$12,500 00

Expenditures.

By the Canal Commissioners, including payments for damages, ...	$3,000 00	
By the superintendent of repairs, including the payments to lock-tenders, ...	6,000 00	
For the collection of tolls, including all the expenses of collectors' offices, ...	1,000 00	
Interest on loans, ...	11,850 00	
		21,850 00
Showing a deficiency in the revenue of this canal, to meet the charges upon it for 1831, of		$9,350 00

REMARKS.

Erie and Champlain Canal Fund.

The statement marked A, annexed to this report, will show that the balance of moneys belonging to this fund, and remaining on deposit to the credit of the Commissioners, without any permanent investment, was, on the first day of January last, $1,388,096.95. This large surplus has been suffered to accumulate, without being invested according to the discretion given to the Commissioners by the statute for that purpose, solely on account of their inability to make investments upon terms which seemed to them advantageous to the interests of the fund. Repeated efforts have been made, during the past year, to purchase canal stocks, and especially the five per cents redeemable in 1837, but without effect. The moneys, as now deposited, bring to the fund an interest of three and an half per cent, and the interest paying upon these stocks is five per cent, so that the difference between the receipts and payments of interest is one and a half per cent per annum against the fund. The stocks referred to, have less than seven years to run, and this difference of interest, for seven years, would be only ten and a half per cent, while the market price of the stocks have been from twelve and a half to fourteen per cent. Their purchase, therefore, at these prices, as a mode of investing this surplus, would be a loss to the fund, because the premium to be paid would amount to more than the difference between the interest received upon the deposits and that to be paid upon the stock for the whole time it has to run.

It is probably true, that the five per cents, redeemable in 1845, might, to some extent, have been purchased upon terms which, considering the time these stocks have to run, would have made their purchase advantageous, if reference only had been had to the cancelling of those stocks; but the Commissioners find few of the canal stocks offered in our markets, and those generally in small parcels, and at so ready sales as to render their purchase by them very difficult, unless they attempt to bring them into the market and within the reach of their offers, by advancing upon the current price.

Instead of doing this, they have considered it more for the interest of the fund, and more consonant with the policy marked out by the solemn pledge which the people have imposed upon these moneys, to retain them in a situation that they may be applied to the extinguishment of the stock which first becomes redeemable. The payment of the whole debt charged upon the canal fund, as soon as by the face of the certificates it becomes payable, is a matter of the most earnest desire with the Commissioners, and that the failure, if any is to happen, may not exhibit itself in the very first instance when an opportunity offers to make a redemption, they have hitherto endeavored to put such surplus moneys as should come into their hands into the most productive state possible, without placing them beyond their reach on the first of July, 1837, when 3,489,000 dollars of the canal stock is payable. They believe themselves justified in the hope that the product of the fund, before that period, will put into their hands the means of cancelling the whole of that stock, and, in any event, it must enable them to redeem the six per cents, amounting to 2,093,500 dollars, if not also the whole of the 1,395,500 dollars of five per cents.

Should it do more, as it is fair to expect it may, it will then be their duty to seek the purchase of the other stocks upon the best terms they shall be able to obtain, not injurious to the interests of the fund.

During the past year, there has been paid off and cancelled $30,977.14 of this debt, which was done in consequence of the transfer of bonds for lands to the literature fund, in exchange for this stock, pursuant to the direction of the act of the 16th April, 1830. This is all the diminution which the debt charged upon this fund has undergone since the last annual report.

From the statement marked A, before referred to, it will further appear that the surplus on deposit to the credit of the Commissioners on the first day of January, 1831, exceeded the amount on deposit on the first day of January, 1830, by the sum of $824,187.13; and it may be supposed that this amount has been the excess of the products of the fund over and above the calls upon it, for the year 1830. This, however, is not the fact, as certain payments of the surplus of former years enter into this amount. The following statement will show the real surplus for the last year.

Apparent surplus as above stated, ...		$824,187 13
Add payment to redeem stock, ...		30,977 14
		$855,164 27
Deduct the following receipts, they being payments of the surplus of former years, viz: Part of the loan to the city of Albany, ...	$70,000 00	
Balance due from the Cayuga and Seneca canal fund for advances in 1829, ...	9,697 61	
Balance due from the Oswego canal fund for advances in 1829, ...	22,491 65	
		102,189 26
And it will leave the real surplus for the year 1830, ..		752,975 01

This exceeds the surplus yielded by this fund for the year 1829, by the sum of $260,026.06, and exceeds the estimate made by the Commissioners, by nearly the same sum. This very great difference between the two years, is principally to be accounted for by the increased receipt of tolls; the amount from this source alone, paid into the treasury for the year 1830, being greater than that for

1829, by $223,168.50. The revenue derived from vendue duties for the last year, has been less than that for the preceding year, by the sum of $36,704.16, while the salt duties have exceeded the receipts of 1829, by $6,261.07; making a net diminution in these sources of revenue, during the last year, of more than $30,000. The expenditures by the Commissioners for the last, have been diminished from those of the preceding year, by $30,442.40, and the payments to superintendents of repairs are less than the same payments for the former year, by $23,460.02. The variations in the above mentioned items of receipts and expenditures, and the increased amount received from the interest upon deposits, being $16,423.87 more than for 1829, contribute all the material variations between the receipts and expenditures of the two years.

The Commissioners have made estimates of the receipts and expenditures of this fund for 1831, which will be found to precede these remarks; but it will be seen by the above comparisons of the years 1829 and 1830, and of the estimated with the actual receipts of the latter year, that an estimate of the receipts from tolls is a very uncertain dependance. Indeed, the collections of tolls depend so much upon the seasons, the harvests and the markets, as to prevent the possibility of making them a subject of anticipation, with any degree of certainty as to amount. The collections of the preceding have usually been referred to as the ground of the estimate for the subsequent year, while constant experience shows that so large a portion of the crop of each year comes to the market in the same year, that its effect upon the tolls of the following year is much less than is usually ascribed to it. Any estimate, therefore, must very materially depend upon the character of the season and the state of the markets during the year for which it is made.

The anticipated surplus of the canal fund for the present year, is $730,433.20; and should the present prospects of trade continue, and the harvests be equal to those of the two last years, it is confidently believed that the anticipation will not be disappointed.

It has not occurred to the Commissioners, that any extension of their powers to make investments, or any act of legislation, is required for the interests of this fund, or can materially benefit its revenues. They have not believed that any investments, other than those now authorised by law, can be made to a sufficient extent and with sufficient certainty of having the moneys at command, when they shall be required for the redemption of the stock, to make it an object to attempt to raise them; while they cannot but think it rational to suppose that the stocks redeemable in 1837, if the certainty of their redemption at that period is made known to the holders, will soon come into the market at prices graduated according to the remaining life of the certificates, and at such prices as will enable the Commissioners to purchase them without loss to the fund.

The law at present regulating the deposits of the salt duties, should, in the opinion of the Commissioners, be repealed. Sections thirty-nine and forty of title ten, chapter nine of the first part of the Revised Statutes, contain the provisions referred to, and direct that these deposits shall be made monthly, in one of the banks in the town of Utica, and that duplicate certificates of deposit shall be taken, one of which shall be forthwith forwarded by mail to the Comptroller. The difficulties which the Commissioners find with these provisions are, that they cannot be strictly complied with, and that they impose a responsibility upon the superintendent now unnecessary.

The money received for salt duties is mostly in the bills of the country banks, and neither of the banks in the town of Utica will receive these deposits and give the certificates required, leaving the Treasurer at liberty to draw for the amount as soon as the certificate shall reach the Comptroller. The reason is palpable: the money they receive cannot be exchanged so soon as the Treasurer's draft will be presented; and many of the bills they receive, will not answer in payment of the draft, as it must always be drawn in favor of some one of the city banks. This difficulty can only be obviated by making special certificates of deposit; and these, if received, would be transferring the trouble of the exchange of the money, from the bank to the Treasurer, who possesses none of the facilities of the banks for making these exchanges. As the most convenient practicable mode, therefore, of obviating this difficulty, an arrangement has been made with one of these banks, to allow it the use of the moneys deposited, for a stipulated period, in consideration of its answering the drafts of the Treasurer in funds current at the banks in which the surplus moneys of the canal fund are deposited.

These provisions also make it the duty of the superintendent to remit these moneys to the bank, at his own risk and upon his own responsibility; and experience has already shown that the risk of transmission is by no means inconsiderable. To relieve this officer from this responsibility, the contract with the bank has been made to include the transportation of the money, and it is now received through an agent of the bank residing at Syracuse, and when paid into the hands of the agent, is, by the arrangement, to be considered deposited in the bank.

All this, however, is now done, not only without law, but necessarily in disregard of the implied if not the express provisions of the sections referred to.

These duties are a part of the revenues of the canal fund, and no necessity is seen of placing the deposits of the moneys derived from this source upon a footing different from the canal tolls. They are to be deposited in such banks and upon such terms as the Canal Board shall direct, and no difficulties have as yet been found in inducing the banks to receive these tolls at the places where they are collected, to transmit them at their own risk to their respective vaults, and to answer the Treasurer's drafts for them in current funds, by allowing to them a reasonable use of the moneys deposited, as a compensation for making the exchanges, and for their trouble and risk. The same thing might also be done, with equal ease, in regard to the salt duties. This course too would cause these deposits to be made as they should be made, daily, or at farthest, weekly, instead of monthly. These collections often amount to from $25,000 to $30,000 for a single month; and no public agent should be permitted or compelled to keep in his hands so great a sum of money, for any period of time. There is now also a bank in the immediate vicinity of the principal salt manufactories, and it is more than probable that better terms for these deposits can be procured from this institution, than can be offered by any remote bank, with the hazard of the remittances.

The Commissioners therefore recommend the repeal of these sections, and the passage of a law putting these deposits under the direction of the Canal Board, subject to the same regulations which govern the deposits of canal tolls.

It may be well to remark, in reference to the large increase of tolls received to this fund during the last year, that the whole increase has arisen from the tolls collected upon the Erie canal alone. Indeed the collections upon the Champlain canal have been considerably diminished from the preceding year, which fact is probably to be attributed partly to the very dull market for lumber in he early part of the season, and partly to the extensive injuries sustained by the mills and manufactories of iron in the northern part of the state, from the unusual flood which took place in July last. This latter cause may to some extent continue its influence upon the tolls to be received upon this canal for the ensuing season.

The Oswego Canal Fund.

It will be seen from the statement annexed, marked B, that pursuant to the act, chapter 184, of 1830, a further transfer of the bonds for lands belonging to this fund has been made during the last year, amounting to $30,268.47, and that the money to this amount has been received from the Erie and Champlain canal fund, and applied to the extinguishment of the debt standing against this fund, at the close of the year 1829, and the balance towards the deficiency of the revenues of the fund to meet the calls of the year.

By the act, chapter 288, of the last session, all the deficiencies in the revenue of this fund, to keep the canal in repair and to pay the interest upon the debt contracted for its construction, were made a charge upon the general fund, and payable as a part of the ordinary expenses of the government. The whole amount of these deficiencies for the last year was $23,839.00, but $7,776.82 of sum this was paid from the money derived from the sale of the bonds, as above-mentioned, thus leaving for that year the sum of $16,062.18 to be paid out of the treasury of the state to balance the accounts of the Oswego canal. This sum has been drawn from the treasury and thus applied.

The estimate of the receipts and expenditures of this fund, for the present year, will be found following the estimates for the Erie and Champlain canal fund. The tolls are estimated at $12,500, being $500 more than the estimate for the last year. The actual receipts of tolls for the last year, including the expenses of collection, have been $12,335.18. The estimate of expenses chargeable upon this fund for the present year, amounts to $36,650.00. The actual expenses of the last year for the same items amounted to $39,874.93. From these statements it will be seen that the estimates for this fund have been made upon both sides as favorable to the fund as the experience of the past will possibly warrant, and still the result will show an anticipated deficiency of $23,350, or $1,500 more than the whole interest of the debt.

This deficiency may be partly supplied for the present year, by another transfer of the bonds for lands belonging to this fund, to the Literature Fund, in exchange for five per cent. canal stock, belonging to it, and by a sale of the stock so received, to the Erie and Champlain Canal Fund for its amount in money. This exchange has taken place in this manner between these funds, for several years now last past, but no law passed upon the subject, has extended beyond the making of a particular transfer, so that another act will be necessary, should the legislature think it advisable to make a further exchange.

The effect upon the different funds to be produced by these transfers, will be found particularly pointed out in the last annual report of the Commissioners, and it will there be seen, that in the opinion of the Commissioners, the operation is beneficial to all of them. The amount of five per cent. canal stock, yet held by the Regents of the University, in trust for the Literature Fund, as will be seen by the annual report of the Comptroller, is $21,779.87; and the amount of bonds now in the Comptroller's office, belonging to the Oswego Canal Fund, and proposed to be transferred, is only $9,884 76 cents.

The Commissioners therefore recommend the passage of a law, either general in its provisions, and authorising transfers of these bonds, whenever it shall be considered advisable by the Commissioners, and the necessities of the fund to which they belong, shall seem to demand it; or specially authorising the transfer of the bonds above mentioned. If this be done, the amount to be drawn from the treasury to sustain this fund for the present year, will be diminished by the amount due upon the bonds at the time they shall be transferred, and instead therefore of being the whole amount of the estimated deficiency of the Oswego canal fund, may be expected not to exceed the sum of $13,465.

It may be proper to remark, for the information of the legislature, that most of the bonds belonging to this fund, have already been sold, and that it is not believed that enough remains, including the bonds now proposed to be transferred, to equal or more than equal the five per cent stock belonging to the literature fund.

The last exchange made pursuant to the law of the last session, completed the cancelling of the whole of the $150,000 of canal stock transferred to the Literature fund by the act of the 13th April, 1827, and by that act directed to be so exchanged, and also cancelled $16,026.46 in amount of other five per cent. canal stock, belonging to the Literature fund.

As lumber constitutes one of the principal articles of tonnage upon this canal, and as it has already been mentioned that the market for this article, during some part of the last season, was not favorable, it may not be surprising that the tolls received have but very triflingly exceeded the anticipations at the commencement of the last year, while the collections upon the Erie canal have far outreached any former precedent. But it is hoped that the better prospect at present existing for the sale of lumber, may continue during the coming season, and that its effects may be beneficially felt in the revenues of this fund. Still any encouragement that it will be able to meet the ordinary calls upon it, or even that it will be able, from its revenues, to pay the expense of repairs and superintendence of the canal, without any regard to the interest upon its debt, the commissioners fear cannot be justly given.

Cayuga and Seneca Canal.

The revenues of this canal are not sustained by any auxiliary fund, and therefore the receipts of tolls only are to be depended upon to meet the interest of the debt and the expenses of the canal. The deficiencies in this source of revenue had left a debt due to the Erie and Champlain canal fund at the close of the year 1829, amounting to $9,697.61, while the anticipated deficiency in this revenue to meet the ordinary charges upon the canal for the year 1830, as shown by the estimate of the Commissioners, to be found in their last annual report, was $14,650. To provide for the payment of these two sums as well as to direct the manner in which the continued deficiencies in the revenue of this canal should be supplied, was the duty of the Legislature; to discharge which the act of the 20th April, 1830, was passed. By this act all deficiencies in the revenue of this canal, to keep the canal in repair, and to pay the interest upon the debt contracted for its construction, were made chargeable upon the general fund, and payable out of the treasury of the state, as a part of the ordinary expenses of the government.

Pursuant to this act, the above debt to the Erie and Champlain canal fund of $9,697.61 was paid out of the treasury, during the last year, as was also the deficiency in the revenues of the canal to pay the cost of superintendence and repairs, and the interest upon the debt, which deficiency amounted to $12,308.50; a larger sum by $47.49 than the whole revenues of the canal. This canal, therefore, took from the treasury of the state, during the last year $22,-006.11, but $9,697.61 of the amount went to pay the deficiencies of the preceding year.

The estimate of the receipts and expenditures of this canal for the present year, will be found following the estimates for the Oswego canal fund. From this estimate it will be seen, that a deficiency for the present year, chargeable upon the treasury, pursuant to the act above mentioned, amounting to $9,350, is anticipated. Still the estimate of tolls is $500 above the same estimate for the last year. As this canal is the connecting link between the Seneca and Cayuga lakes and the Erie canal, and affords the only navigable outlet to a very extensive section of the state, not surpassed by any other as wheat growing territory, and furnishing considerable quantities of lumber, plaster, and other articles of tonnage, it may be supposed absurd in the Commissioners to have anticipated an increase of tolls from this navigation, while their estimate for the Erie and Champlain canals is less than the actual receipts of the past year.

It will not be pretended that this difference in the ratio of estimates for the two works is founded upon any known facts authorising the distinction, but it has been supposed possible that the Chemung canal may be so far completed, towards the close of the coming season, as to be at least partially navigable; and should it send any tonnage on to the Seneca lake which does not now come there, the consequence will probably be an increase, to an equal amount, of the tonnage transported on this canal. It may be however that the consciousness of the great inadequacy of the revenue of this canal to meet the charges upon it, and the continued burden it threatens to be upon the treasury rather than any just grounds of hope, have induced the Commissioners to anticipate an improvement in the tolls beyond the receipts of the last year.

The Chemung Canal.

In obedience to the directions of the act for the construction of this canal, and upon the call of the acting Canal Commissioners, for that purpose, a loan was made in the month of July last, to the amount of $150,000, to be applied to this work. Twenty thousand dollars of this loan was taken at a premium of 11 per cent., and the remaining $130,000 was taken at a premium of $10\frac{38}{100}$ per cent.; these being the best offers made for the stock, and coming within the terms published by the Commissioners, and upon which the proposals were to be made. They were also, in the opinion of the Commissioners, the best offers for the interest of the canal, which were received, without regard to the terms of their notice.

The moneys obtained upon this loan were offered to the banks in Albany and Troy, as a deposit for the best terms which should be proposed, and the deposit was taken by the Merchants' and Mechanics' bank of Troy, it having offered $4\frac{1}{2}$ per cent. for $30,000 of the sum to be last drawn for, and 4 per cent. for the residue, and being the best offer received. Of the money so deposited, $64,115 has been drawn and expended by the Canal Commissioner, having charge of the work, and the balance, $93,379, remains upon deposit.

All which is respectfully submitted.

SILAS WRIGHT, JR.
A. C. FLAGG,
GREENE C. BRONSON,
A. KEYSER,
SIMEON DE WITT,
Commissioners of the Canal Fund.

Dated, Albany, 2d February, 1831.

Statement A, shows the amount of money received during the year on account of the Erie and Champlain canal fund, and the sources from which it has been derived; and also the amount of money paid, with a general specification of the objects for which the payments were made.

B, shows the like in relation to the Oswego canal fund.

C, shows the like in relation to the Cayuga and Seneca canal fund.

D, shows the like in relation to the Chemung canal fund.

E, shows that portion of the revenue of the Erie and Champlain canal fund for the year 1830, derived immediately from the canals, together with the charges upon them for maintenance and the payment of interest on the debts contracted for their construction.

F, shows the like in relation to the Oswego canal.

G, shows the like in relation to the Cayuga and Seneca canal.

H, shows the present amounts of the debts of the several canals, the description of the stock, and the periods after which they are redeemable at the pleasure of the State.

I, shows the correct amount of tolls collected during the last year on each of the canals, and also the amounts received by the several collectors in each month, while the canals were navigable.

STATEMENTS

Of Receipts and Expenditures, by the Commissioners of the Canal Fund, from the 1st January, to the 31st December, 1830.

(A.)
